VCI Monthly Community Webinar

A scientist in a white lab coat is working in a laboratory. She is standing at a lab bench, looking down at something in her hands. The bench is cluttered with various pieces of laboratory glassware, including several Erlenmeyer flasks, a graduated cylinder, and a beaker. There are also some small bottles and a multi-well plate. In the background, there are shelves with more lab equipment and a large window. The entire image has a yellowish tint.

- 4 Closing Remarks

VCI Charter

Empower individuals with access to a trustworthy and verifiable copy of their vaccination records in digital or paper form using open, interoperable standards.

Harmonize standard development and support development of implementation guides needed to issue, share, and validate vaccination records bound to an individual identity.

Individuals can then use those verifiable credentials for medical purposes and to demonstrate their vaccination status to safely return to work, school and travel.

International Coordination

E.U. Set to Let Vaccinated U.S. Tourists Visit This Summer

The head of the European Commission said the bloc would switch policy, under certain conditions, after more than a year of mostly banning nonessential travel.

COVID-19: Digital green certificates

PAGE CONTENTS

What is a Digital Green Certificate?

How will citizens get the certificate?

How will it help free movement?

How will the certificate work?

On 17 March 2021, the European Commission presented a proposal to create a Digital Green Certificate to facilitate the safe movement of citizens within the EU during the COVID-19 pandemic.

Digital Green Certificates will be valid in all EU Member States.

Smart Vaccination Certificate Working Group

A working group focused on establishing standards for a common architecture for a digital smart vaccination certificate to support vaccine(s) against COVID-19 and other immunizations.

For WHO to remain software neutral, the Smart Vaccination Certificate approach is focused on establishing key specifications, standards and a trust framework for a digital vaccination certificate to facilitate implementation of effective and interoperable digital solutions that support COVID-19 vaccine delivery and monitoring, with intended applicability to other vaccines. With WHO, a number of agencies including UNICEF, ITU and the European Commission are contributing to this initiative through a multi-sectoral working group, focused on joint-learning and supporting use of the finalized specifications and standards for digital vaccination certificates, architected for linkage to national and cross-border digital systems.

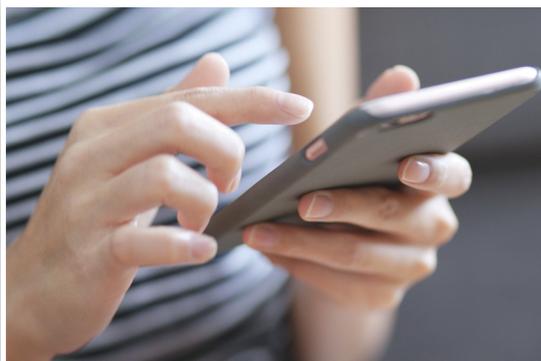

The Smart Vaccination Certificate working group brings together experts to focus on defining specifications and standards for a digital vaccination certificate that would serve current and future requirements, toward the dual purpose of (1) supporting continuity of care as well as (2) cross-border uses – architected for a potential future in which the COVID-19 vaccine would be included in an updated version of the International Health Regulations.

The working group's goal are to:

Starting with vaccine records, Walmart is partnering to help people access their health records in a convenient, free and secure way

BENTONVILLE, Ark., March 17, 2021 – As a healthcare services provider, Walmart is working to empower its customers with digital access to their health data, beginning with their COVID-19 vaccine record. Walmart will make vaccination records available digitally, so those vaccinated at Walmart and Sam's Club can easily access their vaccine status as needed, in a safe, secure and frictionless way.
